

SUMMARY

Developer with five years of experience building and deploying full stack applications. I began studying web development after falling in love with web programming and security at university. Since then I have been designing and building responsive tools to help users accomplish their goals. I began working with React JS three years ago and have been astonished by how easy and enjoyable it is to build responsive cross platform applications. I prefer to work on both sides of the application, balancing writing foolproof logic and designing pleasing user interfaces.

EDUCATION

UNIVERSITY OF CALIFORNIA, DAVIS

2017-2020

B.A IN PHILOSOPHY, MINOR IN COMPUTER SCIENCE

RECEIVED JUNE 11TH, 2020

COMPTIA SECURITY+ CERTIFICATION

2021

RECEIVED MARCH 10TH, 2021

EXPERIENCE

I HAVE SEVERAL YEARS OF EXPERIENCE DEVELOPING FULL-STACK APPLICATIONS AND DEPLOYING ON A RANGE OF CLOUD PLATFORMS.
